

Fluke Fiber Optics Cleaning Solvent Pen

Fluke Networks' Fiber Optic Cleaning Kits contain the best fiber optic cleaning tools and products to effectively remove the toughest contaminants in any optical fiber cable (OFC) network. With a variety of kit options available, you can choose between the easy-to-use Quick Clean™ Cleaners, the convenient cleaning cube/card, and the best optic solvent pen to clean both patch cords and fiber end faces inside ports. Each of the eight fiber optic cleaning kits include products and materials that are lint-free and enable an optimal wet or dry cleaning process. These customized solvents are more effective than the old isopropyl alcohol (IPA) method used to clean fiber end faces. These new solvents are more effective than IPA at dissolving many contaminants found on optical fiber cables, especially non-ionic compounds like bugger gel and pulling lube.
